PAVEMENT BOARD

BY ECLECTIC DESIGN

Hello & thankyou purchasing this model!

I hope you have a smooth download experience & the model meets your expectations. If you have any issues or questions please feel free to message me on my Eclectic page at CG trader.

ABOUT THE MODEL

The item is a basic pavement board of the sort you might find outside a pub or restaurant

Dimensions to the nearest cm: L 61cm (Unfolded) W 67cm H 104cm

FILES

The model was created on Rhino 7 and rendered in V-Ray Next. format). Other file types are attached, including High & Low Poly mesh.

The Rhino 7/V-ray Model is archived with it's packed V-ray materials & ready to go once unzipped.

I have also included a Vray Scene file (VRSCENE) which comes embedded with all textures & materials. VRSCENE files are compatible accross different platforms running Vray, (Such as 3ds Max).

OTHER INCLUDED FILE FORMATS:

FBX, 3DS (High & Low Poly), OBJ (High & Low Poly & NURBS), Lightwave (High & Low Poly), IGS & STEP. MTL Files are also included.
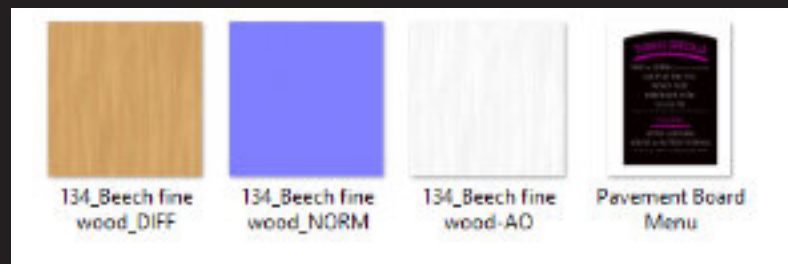

Materials & Textures

All textures & materials can be found in marked folder. The Menu is applied as a decal (Assorted colours inPNG format included).

Materials

V-RAY

Materials
- Beech_Frame
- Black Matte Paint#1
- Black Semi Gloss Paint

ROTATING THE PANELS

The Panels can be open & closed . To do this snap to the centre of the hinge & rotate 15º. Each panel is grouped accordingly. Then finally just rotate the hook to your desire. Job done!

Rotate 15º

Rotate as desired!

Hope you enjoy the model, any feedback is always welcome.

Many thanks!

Nathan,

Eclectic Design.
